

EAP Technical Committee Recommendation

Item: 12

Title: Leg Change Consultation Document

EAP Recommendation: N/A

Question: Legislative changes are necessary to implement the proposed January 2003 assessment processes and timelines. Do the proposed legislation changes, as outlined in the draft consultation document, establish a suitable legislative framework within which the details of the EAP recommendations can be implemented?

Background:

The EAP Recommendations impact a number of Municipal Government Act (MGA) sections. The proposed changes are outlined in the attached draft consultation document. Although broad stakeholder support for change was evident during the EAP process, it is essential to reaffirm stakeholder support for the solutions being proposed by AMA in response to the EAP recommendations.

Recommendation:

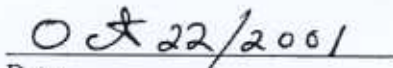

The technical committee supports the consultation document in principle and recognizes that there are municipality-specific issues that need to be resolved during the consultation process.

Recommendation Background:

The technical committee also recognizes that there are regulatory and guideline changes that will be required, and that these will be dealt with in subsequent recommendations from this committee.
